SUMMARY

Full Stack Developer with 4 years of experience building and deploying scalable web applications for business use. Delivered 6+ production systems across POS, ERP, e-commerce, inventory, warehouse and AI SaaS, including a platform supporting 80+ languages and 70+ content tools. Strong in Laravel, PHP and Node.js, secure REST APIs (OAuth2, JWT, RBAC), MySQL and PostgreSQL, and AWS with CI/CD. Owns products from requirements to release, works closely with frontend, mobile, QA and DevOps teams, and uses AI tools such as Claude, Cursor, Codex and Antigravity to ship clean code faster.

SKILLS

Backend	Laravel, PHP, Node.js, Express.js, CodeIgniter, REST APIs, MVC, API Versioning
Frontend	JavaScript (ES6+), Next.js, HTML5, CSS3, Bootstrap, Blade, Responsive Design
Databases	MySQL, PostgreSQL, MongoDB, Database Design, Query Optimization, Indexing
Security	OAuth2, JWT, Role-Based Access Control (RBAC), Input Validation
Cloud & DevOps	AWS (S3, SES), GitHub Actions, CI/CD, Deployment Automation
Business Systems	POS, ERP, MRP, CRM, HRM, E-commerce, Inventory and Warehouse Management
Tools	Git, GitHub, Postman, Insomnia
AI Tools	Claude, Cursor IDE, Codex, Antigravity

EXPERIENCE

Red Star Technologies
Sep 2026 - Present

Full Stack Developer

- Lead Owner POS, a modular Laravel point-of-sale platform with 5+ separate modules: sales, purchase, inventory, warehouse, e-commerce and reporting.
- Engineered multi-warehouse stock management with automated transfers and low-stock alerts.
- Launched the e-commerce module, syncing online orders, stock and customers with POS data.
- Structured the add-on system so new modules can be enabled per client without changing core code.
- Deliver custom web applications for multiple clients, from requirements to deployment.
- Create Node.js and Express.js REST APIs backed by PostgreSQL.
- Apply AI tools (Claude, Cursor IDE, Codex, Antigravity) to speed up coding, debugging and code review.

HMB Softwares Pvt. Ltd.
Sep 2023 - Aug 2026

Full Stack Developer

- Built ERP, CRM, POS and HRM applications end to end with Laravel, PHP, CodeIgniter, JavaScript and Blade.
- Delivered the Laravel backend for an AI SaaS platform with 70+ content tools in 80+ languages and 3 billing models (monthly, yearly, prepaid).
- Powered a wellness platform on 3 channels (web, Android, iOS), plus a separate B2B dashboard for clinics.
- Secured APIs with OAuth2, JWT, RBAC, validation and versioning.
- Optimized MySQL and MongoDB queries with indexing to improve response times.
- Connected payment gateways, AI services, AWS S3 and Amazon SES to core applications.
- Automated deployments with GitHub Actions CI/CD, reducing manual release effort.

Code Studio Pvt. Ltd.
Nov 2022 - Aug 2023

Junior PHP Developer

- Created Laravel applications following MVC architecture.
- Built REST APIs and tuned database performance.
- Maintained applications using Git and team workflows.

PROJECTS

Owner POS
A modular point-of-sale and business management platform, with add-on modules enabled per client.

- Established multi-warehouse inventory with stock transfers, low-stock alerts and branch-level control.
- Launched an e-commerce module connected to POS stock, orders and customers.
- Included sales, purchase and accounting modules with role-based access.

MRP / ERP System
A unified ERP for a manufacturing client, combining inventory, POS, HRM and accounting in 1 platform.

- Implemented multi-warehouse stock management with real-time low-stock alerts.
- Automated stock transfers between locations.
- Modeled a role-based MySQL structure for multiple roles and departments.

HealMindBody
A wellness platform for meditation, stress relief and sleep tracking on web, Android and iOS.

- Wrote backend APIs and web interfaces for the consumer app.
- Programmed AI-driven logic that builds personalized meditation sessions from mood and goals.
- Architected 1 backend serving the mobile app and a separate B2B dashboard for clinics.

Cosmochat.ai
An AI SaaS content platform with 70+ content tools, supporting 80+ languages.

- Constructed the Laravel backend for article writing, image generation and a chat assistant.
- Implemented credit-based subscriptions with 3 plan types, usage tracking and payments.
- Applied per-plan rate limiting to third-party AI services.

Hostel Management System
A multi-tenant hostel management platform with web and mobile API support.

- Produced the admin dashboard for tenants, room and bed allocation, bookings and invoicing.
- Structured the MySQL schema from scratch with RBAC and API validation.
- Introduced a real-time dashboard for occupancy, income, expenses and pending payments.

Tamimi ATS Website
A corporate website covering company profile, project listings and tenders.

- Built the site end to end with Laravel and Blade.
- Added an admin panel so staff can update projects and company details without code changes.

EDUCATION

Bachelor of Science in Computer Science 2018 - 2022
Gomal University, D.I. Khan | CGPA 3.8/4.0, Graduated with Distinction
