

AAQIB MUSTAFA

BACKEND DEVELOPER

+92 300 5801212 | AAQIBMUSTAFAA@GMAIL.COM | LINKEDIN.COM/IN/AAQIBMUSTAFA
GITHUB: GITHUB.COM/AAQIBMUSTAFA | PORTFOLIO: HTTPS://AAQIBMUSTAFA.GITHUB.IO/

BACKGROUND

Backend Developer with 3+ years of experience building scalable, high performance backend systems and RESTful APIs using PHP, Laravel, and CodeIgniter. Specialized in MRP, ERP, and CRM solutions, with strong expertise in database optimization, secure API design (OAuth2, RBAC), and AI integration. Proven track record of delivering reliable enterprise applications for manufacturing, wellness, and corporate sectors in agile environments.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Gomal University, 2018 – 2023

- Relevant coursework: Data Structures and Algorithms, Database Systems, Software Engineering, Object-Oriented Programming, Web Development
- CGPA: 3.8/4.0

EXPERIENCE

HMB SOFTWARES PVT.LTD. | BACKEND DEVELOPER

Islamabad, PK , Sept 2023 – present

- Architect, develop, and maintain scalable backend applications using **PHP, Laravel, and CodeIgniter**, delivering secure and high-performance enterprise solutions.
- Design and implement **RESTful APIs** with OAuth2, JWT authentication, RBAC, API versioning, and secure integrations for web and mobile applications.
- Develop and manage complex business systems including **ERP, CRM, MRP, POS, HRM, Inventory Management, Accounting, and Multi-Warehouse Management** platforms.
- Design, optimize, and maintain **MySQL and MongoDB** databases through schema architecture, indexing strategies, query optimization, and performance tuning.
- Implement business logic, background jobs, scheduled tasks, caching mechanisms, and server-side validations to ensure reliability and scalability.
- Integrate third-party services such as **payment gateways, cloud platforms, AI services, SMS gateways, email services, and external APIs** to extend application capabilities.
- Collaborate with frontend and mobile development teams by providing secure, well-documented, and efficient backend services and APIs.
- Utilize **Git, GitHub, CI/CD workflows, and software development best practices** to deliver maintainable, secure, and high-quality backend solutions.

CODE STUDIO PVT. LTD. | JUNIOR PHP DEVELOPER

Islamabad, PK, Nov 2022 – Aug 2023

- Developed and maintained web applications using PHP & Laravel following MVC architecture best practices
- Built RESTful APIs and optimized database queries to improve application response times
- Debugged backend issues, resolved performance bottlenecks, and delivered clean code in collaborative Git workflows
- Gained strong fundamentals in backend architecture, API design, and team-based software development

SKILLS

- PHP (Core PHP, Laravel, CodeIgniter)
- Database Design & Optimization (MySQL, MongoDB, PostgreSQL)
- Version Control (Git, GitHub, GitLab)
- RESTful API Development & Integration
- MVC Architecture & Clean Code Practices
- API Testing Tools (Postman, Insomnia)
- API Security (OAuth2, JWT, RBAC)

KEY PROJECTS

HEALMINDBODY — AI-POWERED WELLNESS PLATFORM

- Built scalable RESTful APIs supporting web, Android & iOS for mental, emotional, and physical wellness features including guided meditation, stress relief, and sleep support
- Developed backend APIs for AI-optimized meditation tracking, wellness journaling, and mood-based personalized session delivery across consumer and B2B (HMB Connect) platforms
- Integrated AI services to generate unique meditation sessions based on real-time user mood and wellness goals, powering adaptive experiences for individual users and enterprise clients
- Architected multi-platform backend serving both the consumer mobile app and HMB Connect — a separate B2B dashboard for clinics, businesses, and wellness professionals

MRP SYSTEM — MANUFACTURING RESOURCE PLANNING

- Developed a custom enterprise-grade MRP system from scratch in Laravel, integrating Inventory, POS, HRM, and Accounting modules into a single unified platform
- Implemented multi-warehouse stock management with real-time low-stock alerts, stock transfer between warehouses, and automated reporting dashboards
- Built complete HRM and Accounting modules covering employee management, payroll processing, ledger tracking, invoice generation, and expense management
- Designed scalable MySQL database architecture with role-based access control, ensuring secure multi-user access across all integrated business modules

COSMOCHAT — AI CONTENT PLATFORM

- Built robust Laravel backend for an AI-powered SaaS content platform serving web and mobile users across 80+ languages with 70+ content generation use cases
- Developed secure high-traffic APIs supporting article generation, image generation, chat assistant, content rewriting, ad copy, and social media content at scale
- Implemented a credit-based subscription system with multiple billing tiers — monthly, yearly, and prepaid — handling payment processing and usage tracking
- Integrated third-party AI services for content generation, image synthesis, and moderation with rate limiting and quota enforcement per subscription plan

HOSTEL MANAGEMENT SYSTEM

- Developed full backend in CodeIgniter with web and mobile API support, powering a multi-tenant hostel management platform
- Built comprehensive admin dashboard with tenant management, room/bed allocation, booking system, invoice generation, and real-time occupancy analytics
- Designed optimized MySQL schema and implemented authentication, RBAC, and API validation from scratch supporting complete financial tracking — income, expenses, and unpaid invoices
- Delivered real-time analytics dashboard with live KPIs including total tenants, bed capacity, monthly income/expense tracking, and pending payment alerts

TAMIMI ATS — CORPORATE WEBSITE

- Developed a custom corporate website using Laravel and Blade templating engine for Tamimi, showcasing company profile, projects, and tenders
- Implemented dynamic content management through Laravel backend allowing admins to update projects, tenders, and corporate information without code changes
